(Carrier Service Cell)

**PRESS RELEASE (For DoT Website)**

**10<sup>th</sup> May 2021, New Delhi**

It has come to the notice of DoT that several misleading messages are being circulated on various social media platforms claiming that the second wave of coronavirus has been caused by the testing of the 5G mobile towers. These messages are false and absolutely not correct.

The general public is hereby informed that there is no link between 5G technology and spread of COVID-19 and they are urged to not be misguided by the false information and rumours spread in this matter. The claims linking the 5G technology with the COVID-19 pandemic are false and have no scientific basis. Moreover, it is informed that the testing of the 5G network has not yet started anywhere in India. Hence, the claim that 5G trials or network are causing coronavirus in India is baseless and false.

Mobile towers emit non-ionizing Radio frequencies having very minuscule power and are incapable of causing any kind of damage to living cells including human beings. Department of Telecommunications (**DoT**) has prescribed norms for exposure limit for the Radio Frequency Field (i.e. Base Station Emissions) which are 10 times more stringent than the safe limits prescribed by International Commission on Non-Ionizing Radiation Protection (**ICNIRP**) and recommended by World Health Organization (**WHO**).

Such restriction removes any requirement of having any separate norms/regulations on installation of mobile tower for special localities like residential areas, schools, hospitals etc. as the radiation emitted by these towers are incapable of causing any damage to a living cell.

**Initiatives already taken by DoT:** DoT has a well-structured process including submission of self-certificate by Telecommunications Service Providers (**TSPs**) and physical audit upto 10% of total sites randomly by the field units of DoT so that TSPs strictly adhere to these prescribed norms.

However, any citizen having any apprehension about any mobile tower emitting radio waves beyond the safe limit prescribed by the department, can request for EMF measurements/testing on Tarang Sanchar portal at <https://tarangsanchar.gov.in/emfportal>.

To allay the fear of general public regarding health effects of EMF emission from mobile tower, DoT has been taking several steps to generate awareness among the public about EMF radiation such as Nation-wide Awareness Programme, distribution of pamphlets/ information brochure on various topics related to EMF, publishing detailed information on EMF related issues on the website of DoT, advertisements in newspapers, launch of “Tarang Sanchar” portal etc. The field units of DoT have also been organizing public awareness events so that more and more people are made aware about the scientific facts on health effects of EMF emissions from mobile towers.
