

#### Government of Mizoram

## RFD

(Results-Framework Document) for

Department of Information & Communication Technology (2015-2016)

### Section 1: Vision, Mission, Objectives and Functions

#### Vision

e-Development as the engine of transformation of the state.

#### Mission

e-Development of Mizoram through creation of e-Infrastructure to facilitate and promote e-Governance, promotion of Information & Communication Technology, facilitate and promote Research & Development (R&D) for innovation, capacity building and empowerment of citizen, building knowledge network for Cyber Crime and Security.

#### Objectives

- e-Governance: Providing e-Infrastructure for delivery of services.
- 2 e-Industry: Promotion of Information & Communication Technology.
- 3 e-Innovation/R&D: Facilitate and promote Research & Development for innovation in emerging areas of technology.
- 4 e-Education: Providing support for Capacity Building and empowerment of government employees.
- 5 e-Security: Building knowledge network for Cyber Crime and Security.

#### **Functions**

- 1 Policy matters relating to Information and Communication Technology.
- 2 Information Technology Acts and Rules
- 3 Matters relating to Information Technology Enabled Services (ITES) and Internet.
- 4 Information Technology Infrastructure Development like Software Technology Park of India (STPI), State Wide Area Network (SWAN), Common Services Centre (CSC), State Data Centre (SDC), Community Information Centre (CIC), etc.
- 5 Promotion and Standardization of IT Education e-Learning.
- 6 Matters relating to e-governance, e-commerce, e-medicine, e-infrastructure, etc.
- 7 Matters relating to e-security and cyber laws.
- 8 Coordination of Information Technology related matters with National and International Agencies, Bodies and Institutions (NIC, NIELIT, etc.).
- 9 Telecommunication and its related matters.

## Section 1: Vision, Mission, Objectives and Functions

- 10 IT related Public Sector Undertakings and Societies (ZENICS, MSeGS, etc).
- 11 Matters relating to Unique Identification (UID).

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

| SI.No | Success indicator                           | Description   | Definition   | Measurement   | General Comments   |
|-------|---|---|--|---|--|
| 4     | [1.1.4] Nodes connected                     | State Wide Area Network is utilized by departments' employees to access internet and intranets facilities.  | State departments and subordinate offices Employees could use SWAN to have internet and intranet connectivity for faster and efficient communication.  | Number of users using SWAN to access internet or intranet. Values set to be achieved for various years are given as accumulative. | Number of individual computers connected to the network.                     |
| 5     | [1.2.1] Application hosted                  | Service modules are modules that are a part of new application or existing application hosted in State Data Centre.   | State Data Centre is designated to host any Government application which comprises of modules. The functionality and significance of each module may vary but the availability of their services are equally critical. | Number of service modules implemented. Values set to be achieved for various years are given as accumulative                      | Source of data: number of service modules hosted on the data centre counted. |
| 6     | [1.2.2] Data Centre uptime                  | Server Uptime of Date Center is a measure of the time a server machine, typically a computer, has been working and available.   | Round the clock availability of the server machine Percentage uptime.  | Values set to be achieved for various years is not accumulative. It has to be achieved every year.                                | Network management system produces the statistics required.                  |
| 7     | [1.2.3] Implementation of Disaster Recovery | State Data Centre stores various important data which should not be lost or tampered in any form. Due to technical reasons, a single system alone could not be trusted and backup of all the necessary information is required in case of natural calamity. | Due to these reasons, Disaster Recovery site should be prepared so that even in case of natural calamity, all the information should be restored back.   | Date of commission of the disaster recovery site.   |  |

Section 4: Description and Definition of Success Indicators and Proposed Measurement Methodology

| SI.No | Success indicator                                | Description   | Definition   | Measurement   | General Comments  |
|-------|--|---|--|---|---|
| 8     | [1.2.4] Implementation of Cloud Computing system | Cloud computing is a computing term based on utility and consumption of computer resources. Cloud computing involves deploying groups of remote servers and software networks that allow different kinds of data sources be uploaded for real time processing to generate computing results without the need to store processed data on the cloud. Clouds can be classified as public, private or hybrid. | Cloud Computing increases hardware utilization by allocating allocated resources.  | Date of implementation.   |   |
| 9     | [1.3.1] Full operationalization of CSCs          | Common Service Centres (CSC's) provides government/ business services to the Citizen through village level entrepreneurs.   | Operated/ Commissioned Common Service Centres (CSC's) provides government/ business services to the Citizen through village level entrepreneurs. | Numbers of Operational<br>Common Service Centres<br>(CSC's) in Mizoram. Values<br>set to be achieved for various<br>years are accumulative                    | Online Monitoring Tools such as<br>Apna CSC provides the number of<br>operational CSCs.   |
| 10    | [1.3.2] Services delivered                       | Government of Mizoram provides various e-services of Government to Citizen Services (G2C) for the public and Businesses to Citizen Services (B2C) through Common Service Centres (CSC's).   | Various G2C and B2C e-<br>Services will be provided to<br>the public through Common<br>Service Centres (CSC's)<br>across Mizoram.                | Numbers of G2C and B2C<br>Services provided through<br>Common Service Centres<br>(CSC's). Values set to be<br>achieved for various years are<br>accumulative. | Online Monitoring Tools such as<br>Apna CSC provides the number of<br>services delivered. |
